

MONTHLY BULLETIN

MAY 2005

ISSN 1582-0491

N O T E

The drafting was completed on 29 July 2005.

The National Institute of Statistics, Ministry of Public Finance, Bucharest Stock Exchange, RASDAQ and National Bank of Romania supplied data.

Some of the data are still provisional and will be updated as appropriate in the subsequent issues.

*The Research and Publications Department carried out the drafting,
English version and technical co-ordination.*

*Reproduction of the publication is forbidden. Data may only be used

SUMMARY OF MAIN ECONOMIC DEVELOPMENTS AND MONETARY POLICY IN MAY 2005

Real Economy

In May 2005, industrial production declined markedly (4.7 percent year on year and 4.1 percent month on month), largely as a result of weaker domestic demand for domestically manufactured goods. Despite the slight rebound in June industrial production expected by the managers polled by the National Bank of Romania, the prospects for the June-August period are less encouraging, as both the NIS and the NBR surveys show decreases in the balances of answers regarding output growth.

The number of employees industry-wide contracted in line with economic performance, yet the narrowing trend of the labour market carried on amid the jobs created in construction and other seasonal activities. Unemployment rate dropped 0.2 percentage points month on month to 5.5 percent, while the 12-month growth rate of net wages remained high (12.9 percent in real terms)¹. These developments hint at the persistence of significant pressure on consumption of goods and services.

The explanation for the slower growth rate of retail trade² (except of motor vehicles) could lie, to a great extent, with the overcoming of the peak in demand at Easter, as the slowdown was manifest in May alone, unlike last year, when it occurred around mid-April.

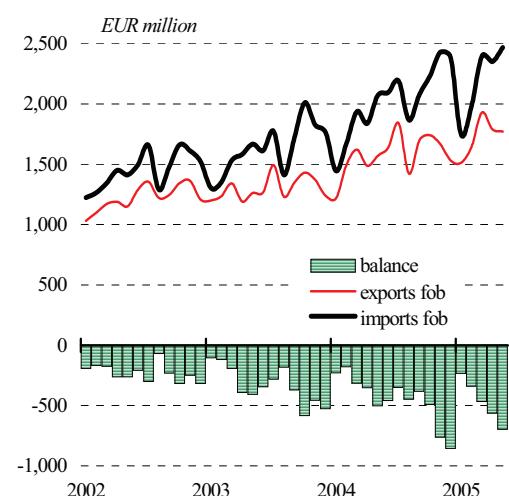

May 2005 saw further widening of the current account deficit (up 62.3 percent year on year), owing chiefly to the burgeoning trade gap and the considerable drop in inflows from current transfers. The annual growth rate of exports (12.9 percent) shed 7.9 percentage points from the previous month and the coverage of imports through exports narrowed to a 5-month low of 71.7 percent.

Calculations based on data supplied by NIS and NBR

Trade Balance

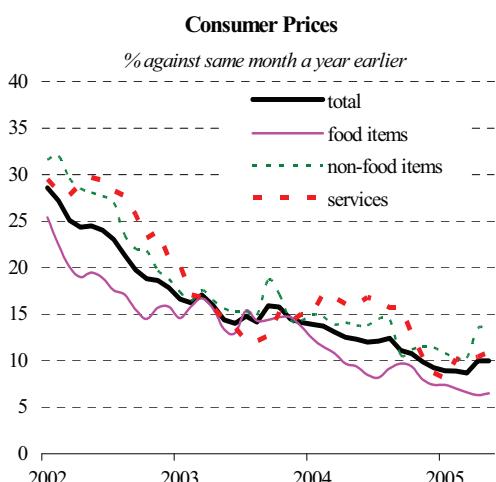

¹ In month-on-month comparison, whole-economy net average wage fell by a real 3.4 percent, due mainly to the base effect (Easter bonuses granted in April).

² -9.3 percentage points year on year and -17.6 percentage points month on month.

Source: NIS, NBR

Source: NIS

The annual growth rate of industrial producer price index for the domestic market (14.3 percent) resumed the downward drift, slowing 0.4 percentage points. A more sluggish picture was apparent in mining (-1 percentage point), even though the annual rate of increase of prices in this sector (+29.3 percent) was still considerably above the average for industry as a whole, most likely as a result of bringing domestic hydrocarbon prices into line with the developments in external prices. For the following two months, both the NIS and the NBR surveys point to a reversal in the trend of annual rates of producer prices, which could mainly be ascribed to the rise in external prices of some commodities (oil, aluminium) and to the adjustment of electricity and natural gas prices.

In May, the annual growth rate of consumer price index remained flat at 10 percent. Significant changes were detected for administered prices of some services (city transport prices rose at an annual rate of 21.6 percent, up 4.5 percentage points month over month) triggered by the April hike in fuel prices and the weakening of the domestic currency against the US dollar. Non-administered prices grew at the same annual pace of 8.7 percent; however, the 12-month growth rate of prices for fruit and vegetables posted a trend reversal because of adverse weather conditions (up 6.6 percent versus 5 percent in April, whereas in May 2004 these prices fell by 8.2 percent).

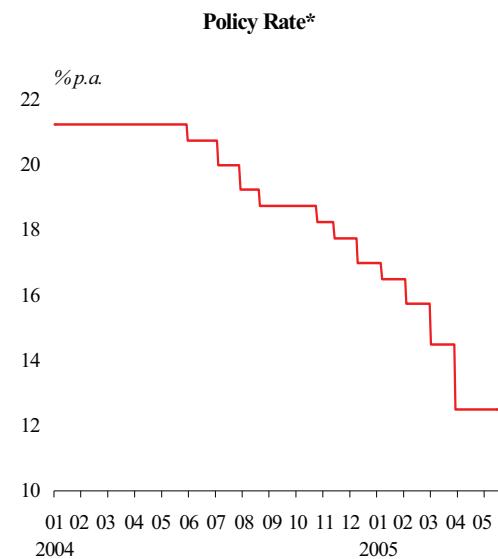

Monetary Policy

Higher-than-expected growth of administered prices, excise duties and oil price in April entailed the spike-up in inflationary pressures, which triggered tightening of the monetary policy stance. Thus, the National Bank of Romania halted the reductions in the policy rate, which remained at 12.5 percent, while the average interest rate on deposit-taking operations rose marginally, its daily values hovering around 8 percent. Monetary conditions were kept relatively tight, due also to further real strengthening, albeit at a slower pace, of the domestic currency against the euro.

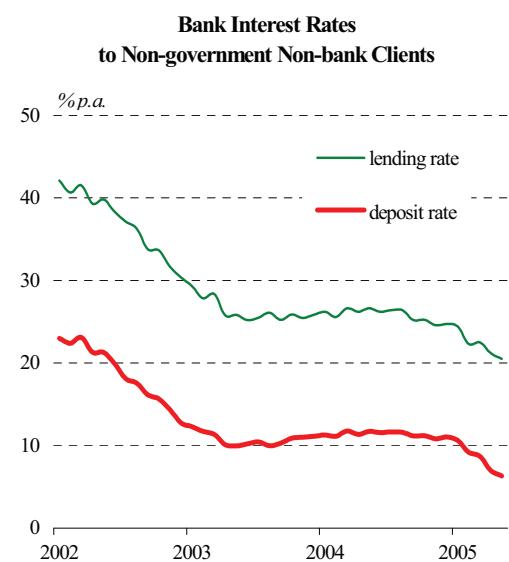

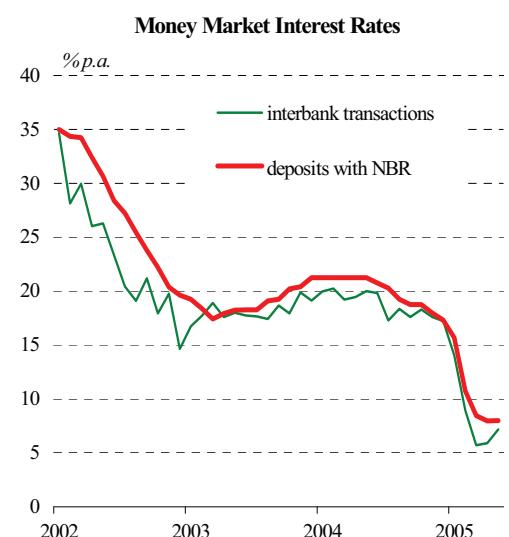

Moreover, the average interest rate on bank/bank operations reached an 18-month high, with the spread between the average interbank rate and the average interest rate on deposit-taking operations narrowing to less than one percentage point. This was the result of both stable policy rate and tighter liquidity conditions. The latter development owed, on the one hand, to firmer monetary control, despite the fact that the central bank resorted only to deposit-taking operations and rejected all the bids submitted by banks at the monthly auction for CDs. On the other hand, the stronger impact of some (seasonal and/or incidental) autonomous factors of liquidity contributed significantly to the mopping-up of excess liquidity as well.

The average interest rates on government securities sold at some auctions organised in May went up slightly. The average yields on 3- and 5-year government paper rose by 0.2 percent and 0.6 percent respectively, whereas the yield on 2-year bonds remained unchanged.

However, interest rates applied by banks to non-bank clients were on the wane, with the pass-through of past policy rate cuts materialising with a certain time lag. Average interest rates on new loans to individuals posted the sharpest drop, i.e. 2.1 percentage points. Conversely, the decrease in average interest rates on time deposits was lower than that seen in April, mostly as a result of a slow decline in overnight rates.

**) maximum interest rate on one-month sterilisation operations*

LEGISLATIVE INDEX

Main Rules and Regulations Adopted in the Economic, Financial, and Banking Areas in May 2005

Law No. 101/3 May 2005 approves Government Ordinance No. 5/2005 amending para. (1) of Art. 6 of Law No. 348/2004 on domestic currency redenomination (*Monitorul Oficial al României* No. 378/5 May 2005).

Law No. 112/3 May 2005 approves Government Ordinance No. 9/2005 on pay rises to be granted in 2005 to budgetary-sector employees whose pays are set pursuant to Government Emergency Ordinance No. 24/2000 on the system of setting basic pays for budgetary-sector employees hired based on employment contracts and for the personnel whose pays are set pursuant to Annexes II and III to Law No. 154/1998 on the system of setting basic pays for budgetary-sector employees and fringe benefits for the remuneration of public dignity functions (*Monitorul Oficial al României* No. 377/5 May 2005).

Order No. 583/6 May 2005 issued by the Minister of Public Finance sets forth the Procedure for Enforcement of the provisions of Articles 32-38 of Government Ordinance No. 59/2003 regarding some categories of goods exempt from customs duty, as approved and amended by Law No. 545/2003, as amended and supplemented subsequently (*Monitorul Oficial al României* No. 404/13 May 2005).

Government Decision No. 410/5 May 2005 amends and supplements the Procedures on the access to employment-boosting measures, financing methods and guidelines for their enforcement, as approved by Government Decision No. 377/2002 (*Monitorul Oficial al României* No. 406/13 May 2005).

Government Emergency Ordinance No. 42/26 May 2005 lays down the measures for the reorganisation of the Savings Bank (Casa de Economii și Consemnațiuni - C.E.C.) ahead of privatisation (*Monitorul Oficial al României* No. 463/1 June 2005).

Main Regulations Issued by the National Bank of Romania in May 2005

Circular No. 15/3 May 2005 sets the NBR reference rate for May 2005 at 7.96 percent per annum (*Monitorul Oficial al României* No. 401/12 May 2005).

Order No. 568/3/4 May 2005 issued by the Minister of Public Finance and the NBR Governor supplements the Accounting Regulations harmonised with Directive 86/635/EEC and the International Accounting Standards applicable to credit institutions, approved by Order No. 1982/5/2001 issued by the Minister of Public Finance and the NBR Governor, as subsequently amended and supplemented (*Monitorul Oficial al României* No. 419/18 May 2005).

*) At year-end, losses were covered from net gains resulting from forex assets and liabilities revaluation, according to the law. In 2004, the loss of ROL 20,430,144 million was covered from the balance of special revaluation account, following the NBR Board approval and in accordance with Art. 44 of Law No. 312/2004 on the Statute of the NBR.

METHODOLOGICAL NOTES

Annex 1 | Monthly data on the main social and economic indicators (data released by the National Institute of Statistics in the Monthly Statistical Bulletin) are preliminary and may be revised subsequently; the final update is made on a yearly basis, based on company surveys and on specific yearly surveys conducted by the National Institute of Statistics. Starting 2004, the base year for computing the industrial production index has been 2000. Starting January 2005, the sample underlying the survey used for measuring wages and the number of employees was subject to alteration. Data series are updated permanently after being released by the National Institute of Statistics.

Annex 2 | For 2005, consumer price indices are calculated on the basis of 2003 average prices and weights based on average expenses in Household Survey.

Annex 6 | **BUBID** – interest rate on deposits taken by banks, **BUBOR** – interest rate on deposits made by banks.

Annexes 7, 8 | Starting May 2003, **interest rates applied by banks** have been calculated in compliance with NBR Norms No. 2/21 February 2003. The said Norms govern the methodology for determining and reporting the average interest rates on current loans and deposits, as well as the average interest rates on new loans and deposits. Data are released by Romanian credit institutions: banks, Romanian legal entities, the branches of banks – foreign legal entities – operating in Romania, and by the central bodies of credit co-operatives.

Annexes 9a, 10 | **The monthly reference rate**, laid down by Circular No. 3/1 February 2002, is calculated as an arithmetic mean (weighted by the volume of transactions), between interest rates on deposits taken by the NBR and reverse repo operations in the month prior to that when the release was made. The annual average reference rate of the NBR is calculated as an arithmetic mean (weighted by the volume of transactions), between monthly reference rates of the NBR.

Open market operations performed by the NBR and lending and deposit facilities granted to banks are

stipulated in NBR Regulation No. 1/30 March 2000. Open market operations performed by the NBR (deposit-taking operations and issues of certificates of deposit) show daily averages of both transactions performed in the reference period (flow data) and their end-of-period balance (stock data). The average interest rate in the reporting month is calculated as an arithmetic mean weighted by the volume of transactions for interest rates on flow/stock operations.

Annex 9b | **Standing facilities (lending and deposit facilities) granted by the NBR to banks** are resorted to by banks, on their initiative, in order to cover their temporary liquidity requirements.

The interest rate on marginal lending facility is the rate at which banks are granted overnight liquidity.

The interest rate on marginal deposit facility is the rate at which banks may place with the NBR their liquidity surplus at the end of the business day. The interest rates on standing facilities are established by the NBR Board, in accordance with the monetary policy objectives.

Annex 9c | NBR Regulation No. 6/24 July 2002 establishes the regime of required reserves. According to the provisions of the said regulation, banks/central bodies of credit co-operatives shall hold funds in ROL and foreign currency in accounts opened with the NBR during the maintenance period (from the 24th of the current month to the 23rd of the following month). **Required reserve ratio** applies during the observance period (from the 24th of the previous month to the 23rd of the current month) to the average level of balance sheet liabilities of banks (countrywide) and the aggregate balance sheet liabilities of credit co-operative networks. **Remuneration of required reserves** represents the interest rate equal to at least the average interest rate applied by banks on demand deposits and is applicable to the actual reserves.

Starting December 2002, the **equity interests in international bodies**, as well as the **liabilities** against them have been re-classified as foreign assets and foreign liabilities respectively.

Interbank assets cover credits to banks, State Treasury's investments with banks and forex deposits with banks in Romania. **Interbank liabilities** include banks' deposits in both ROL and foreign currency with the central bank. **Other assets/liabilities** include items (accounts) relative to the central bank's own activity (assets – tangible fixed assets, debtors, prepaid expenses, etc.; liabilities – settlements, creditors, etc.).

Annexes 10, 12 **General Account of Treasury** includes receipts and payments accounts related to the government budget, local budgets, state social security budget and extrabudgetary funds with banks.

Annexes 10, 12, 14 **Monetary gold** represents the central bank's gold holdings and it is part of international reserves. The National Bank of Romania's stock of monetary gold is **valued in euro** at the price on the London Bullion Market on the last day of the month. Until the end of 2004, the stock of gold was **valued in ROL** at a sole domestic price, while gold inflows and outflows were valued in ROL at the current price. The stock of gold will be revalued at end of year only. Starting January 2005, the stock of gold has been valued in ROL at market price.

Annex 11 The Central Body of Credit Co-operatives CREDITCOOP was included in May 2003. The banks whose licences were revoked are included with their last reporting month, i.e. February 2002 for *Banca Româna de Scont*, March 2002 for *Banca de Investitii si Dezvoltare*, April 2002 for *Banca Turco-Româna*, April 2003 for *Banca Columna*, by adjusting the item "Household deposits" with payments made to depositors.

Annex 12 **Net foreign assets** of banks are calculated by subtracting foreign liabilities in convertible currency from foreign assets in convertible currency (reserve assets plus equity interests in foreign banks).

Annex 13a According to the international standard definition, **Romania's international investment position** includes a country's stock of foreign assets and liabilities at a given moment. The standard table on the international investment position comprises the stocks of foreign assets and liabilities at the beginning and at the end of the period as well as the financial transactions, exchange rate movements, price movements on the international market and other financial changes that occurred over the same period. Financial transactions referred

to in the international investment position are included in the balance-of-payments financial account.

Annex 13b **Medium- and long term external debt** (private debt, non-guaranteed debt) includes the balance of medium- and long-term deposits of foreign banks with resident banks.

Annex 15a **Monthly volume of transactions in the interbank forex market** represents the sum of the daily highs of sales and purchases. Average annual volume of forex transactions is calculated as an arithmetic mean of monthly forex transactions. **The average monthly exchange rate** (ROL/EUR and ROL/USD) is calculated as a simple arithmetic mean of daily exchange rates on the forex market communicated by the National Bank of Romania. **The average annual exchange rate** (ROL/EUR and ROL/USD) is calculated as a simple arithmetic mean of average monthly rates.

Annex 16a **The BET (Bucharest Exchange Trading) index** is the BSE's first official index launched on 22 September 1997. It reflects the overall trend in prices of the ten most liquid shares, serving as a support for risk management in the trading of derivatives, i.e. futures and options. The index is calculated as a capitalisation-weighted average of the securities that make up the index portfolio. Shares must be listed on the BSE's first tier and must have the largest market capitalisation (market capitalisation of companies whose shares are in the BET basket must account for more than 60 percent of total stock market capitalisation); as far as liquidity is concerned, the value of trades in the last 3/6/9 months must be higher than 70 percent of total turnover.

The Composite Index of Bucharest Stock Exchange (BET-C) represents the movements of shares traded on the Bucharest Stock Exchange. The calculation method is the same as that used for the BET index. The index basket is updated automatically by including the new companies, at the price set on the day next to their being listed. Furthermore, the BET-C reflects the changes to the registered capital of listed companies. Investment funds are not included in the basket of BET and BET-C indices. In order to avoid a small number of companies to weigh on the index, the share of any company in the index basket must not be higher than 20 percent.

BET-FI Index was originally computed for the five Financial Investment Companies listed and is envisaged to

include all investment funds to be listed subsequently. The index was launched on 1 November 2000; its start value equalled 1,000 points as of 31 October 2000; the calculation method is the same as that used for the BET-C Index (weighted to capitalisation and updated consistent with capital increases using closing prices).

Annex 16b | **RASDAQ Composite Index** was launched on 31 July 1998, its start value equalling 1,000 points. Every company listed on the RASDAQ Electronic Stock Exchange is included in the index calculation in order to capture the global trend in share prices. In terms of the calculation method, this index belongs to the set of stock market indices computed by weighting for market capitalisation. The share of a symbol in the index is no higher than 25 percent of total capitalisation of the symbols included in RASDAQ-C. **RAQ-I and RAQ-II indices** were launched concurrently with the introduction of the two upper tiers in order to reflect the overall development of the prices of top companies listed on RASDAQ's first and second tiers. The calculation method is the same as that used for RASDAQ-C. They were launched on 28 October 2002 and their start value equalled 1,079.216 points.

Annexes 18a, 18b | Starting 1 January 2003, the **methodology of loan classification and establishment of specific risk provisions** was changed by Regulation No. 5/2002, as amended by Regulation No. 7/2002. The new regulation introduces among others a new loan classification criterion, i.e. the debtor's financial performance that adversely affects the indicators defining asset quality and capital adequacy.

Annexes 19a, 19b, 19c, 19d | **The credit risk information** encompasses identification data on a debtor – non-bank,

legal or natural entity – and on the following ROL- and foreign-exchange-denominated operations whereby credit institutions face credit risk exposure to the respective debtor: (a) loans and (b) commitments assumed by the credit institution on behalf of the debtor. The risk information refers to the exposure of each credit institution in the Romanian banking system to a single debtor, which may be equal to or higher than ROL 200 million. Starting August 2004, following the entry into force of Regulation No. 4/2004 on organisation and operation of Credit Risk Bureau with the National Bank of Romania, the former has also been receiving reports on loans overdue for more than 30 days in respect of individuals whose exposure is less than ROL 200 million.

Starting September 2003, CREDITCOOP – Central Body has also submitted reports to the Credit Information Bureau.

The loan maturity is consistent with Law No. 58/1998 – Banking Act, as amended and supplemented subsequently; **type of ownership of borrower** consistent with Methodological Norms No. 370542/1999 issued by the Ministry of Finance (Types of Ownership Nomenclature); this classification meets the analysis requirements of the National Bank of Romania; **type of loans granted to non-bank, legal and natural entities (by risk)** consistent with the Chart of Accounts for Banks and the norms for its implementation (1997), as amended and supplemented subsequently; **currency-denomination of loans** consistent with applicable regulations worldwide; the classification meets the analysis requirements of the National Bank of Romania; **activity of borrower** according to Order No. 601/2002, issued by the president of the National Institute of Statistics, on updating CANE; the classification meets the analysis requirements of the National Bank of Romania.
